

THE PROJECT

A European project involving France, Spain, Romania, Estonia, Sweden, Denmark, Ireland

The project will run until 2029

Funded by the European Union.
Grant Agreement No 101155975.

GOALS!

AIM

HPV-FASTER-Implement aims at preventing cervical cancer more effectively by offering HPV-vaccination and HPV-based cancer screening.

Especially for those who often experience barriers to access healthcare.

ELIMINATING CERVICAL CANCER TOGETHER HPV-FASTER IMPLEMENT

HPV-FASTER
IMPLEMENT

HPV-FASTER
IMPLEMENT

COMBINING VACCINATION & SCREENING

The project is testing a new approach: offering both HPV vaccines and HPV-based cervical cancer screening to improve protection and detect problems earlier.

REACHING UNDERSERVED COMMUNITIES

It focuses on groups who are often overlooked in healthcare—such as migrant women, trans individuals, incarcerated women, and sex workers—in Denmark, France, Romania, Spain, and Sweden.

UNDERSTANDING & SOLVING BARRIERS

Researchers are learning what gets in the way of access to care and creating solutions that work for each community.

WORKING TOGETHER

The project brings everyone to the table—experts, decision-makers, and the people affected—to shape the strategy together.

MAKING HEALTHCARE FAIRER

The goal: reduce unfair differences in cervical cancer outcomes by making prevention available and effective for everyone.
